Tanya is amazing, worth getting if you're a hardcore fan or a newcomer who wants something new and fun to play as. 10/10 would get this DLC again. Should be free.. This is an awesome character pretty much a complete redesign of the old Tanya with a complete new move-list, it's worth buying.

P.S.

If you have a problem with the game talk to the game developers, Valve has nothing to do with this game being as bad as it is comparing to the console version.. as she was the best fighter in deception and top op in Armageddon, she is a beast here just like she was used to. fairly overpowered, best character in the Kombat pack.. 10/10 would get this DLC again. Tanya is amazing, worth getting if you're a hardcore fan or a newcomer who wants something new and fun to play as. Should be free.

Tanya in my opinion was the worst character, thematically in this Mortal Kombat. She plays decently, but I would only recommend her if you are a fan of playing characters like Mileena, Raiden, or Kitana. as she was the best fighter in deception and too op in armageddon,she is beast here just like she was used to. fairly overpowered, best character in the kombat pack..
